OBJECTIVE

I am seeking an opportunity as a Mid-level QA in the software quality field, aiming to contribute to the company's routine by ensuring user requirements are met, system resources are available, and customer satisfaction is promoted. I am focused on service excellence and continuous process improvement quality.

EDUCATION

- Systems Analysis and Development – Faculdade Einstein, Limeira/SP. 02/2023 - 06/2025.
- Event Technician integrated with high school – ETEC Trajano Camargo, Limeira/SP. 02/2019 - 12/2021.
- IT Technician – Software Development – Cotel, Technical College of Limeira/SP. 02/2020 - 12/2021.

COURSES

- Software Testing and QA Course, Instructor José Correia, Udemy.
- BDD Experience Course, Instructor Fernando Papito, Udemy.

PROFESSIONAL EXPERIENCE

Pleno Quality Analyst – Tria Software

August 2024 — Present

Project DM Card - Responsible for executing and validating documentation, manual tests, regression tests, and API testing for DM App, a digital banking application. Involvement in all product lifecycle stages, from refinement to manual homologation testing, front-end, and back-end. Provided product support by executing and validating incident tests. In charge of planning and writing BDD test cases, executing test scripts, and managing bugs, including identifying root causes. Actively participated in events such as Daily,

Refinements, Three Amigos, and Planning, contributing to the product's development and continuous improvement.

System Implementation Intern – Gplus Sistemas

October 2023 — August 2024

Responsible for system implementation on client machines, ensuring correct operation from the initial installation. Provided technical support during and after implementation, ensuring problem resolution and continuous customer satisfaction. Involved in the commercial area of the product, giving detailed presentations to clients, highlighting its features and benefits, and offering customized solutions to meet specific customer needs.

QUALIFICATIONS AND PROFESSIONAL ACTIVITIES

- System implementation and user technical support.
- Knowledge and experience in manual testing.
- Experience in creating and executing test cases.
- Ability to document defects and reproduce errors.
- Expertise in functional, regression, and exploratory testing.
- Experience with API, front-end testing.
- Practice with SQL language, database querying.
- Knowledge of Agile methodologies.

SOFT SKILLS

Committed and results-oriented, excellent communication skills, ability to work effectively in teams with dynamism and proactivity.
